Response to Amendment

1. Applicant's amendment received on April 10, 2006, in which claims 1-4, 8-9, 11, 14-16, and 18-32 were amended has been fully considered and entered, but the arguments are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The USPTO "Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility" (Official Gazette notice of 22 November 2005), Annex IV, reads as follows:

Claims that recite nothing but the physical characteristics of a form of energy, such as a frequency, voltage, or the strength of a magnetic field, define energy or magnetism, per se, and as such are nonstatutory natural phenomena. O'Reilly, 56 U.S. (15 How.) at 112-14. Moreover, it does not appear that a claim reciting a signal encoded with functional descriptive material falls within any of the categories of patentable subject matter set forth in Sec. 101.

... a signal does not fall within one of the four statutory classes of Sec. 101.

... signal claims are ineligible for patent protection because they do not fall within any of the four statutory classes of Sec. 101.

3. Claim(s) 14, 15, 18 and 26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter as follows.

Claims 14, 15, 18 and 26 define a program product with descriptive material. While "functional descriptive material" may be claimed as a statutory product (i.e., a "manufacture") when embodied on a tangible computer readable medium, a program

product embodying that same functional descriptive material is neither a process nor a product (i.e., a tangible "thing") and therefore does not fall within one of the four statutory classes of § 101. Rather, "signal" is a form of energy, in the absence of any physical structure or tangible material.

The examiner appreciates the applicant effort in amending the Specification in an effort to advance prosecution; however, the non-statutory aspect of the application remains for the following reasons.

The Specification as amended, recites "any other magnetic medium", which could be an electromagnetic wave (Signal). In line 2 of paragraph 0014, "physical" has been deleted and "tangible" has been added. In lines 3-4 of paragraph 14, reference has been made to the deleted physical forms or elements. Tangible does not necessarily equivalent to "physical". Tangible means capable of being perceived, which could be any type of perception and not limited to perception by sense of touch. The physical form of media is further defined as media bearing the software in a scannable format. This form of media together with claim language of "machine readable medium" encompasses a machine language program or a barcode written on a paper, which is nonstatutory. Considering the embodiments disclosed in the amended specification, "computer readable storage medium" stored thereon a "computer program" is the only acceptable statutory claim language. The term tangible added to the specification should be changed back to the original term "physical" to avoid further complication.

Claims 19-32 are rejected by dependency to claims 14, 15, 18 and 26.

Note: Due to the fact that the amendment to the specification did not remove the non-statutory, the rejection is considered final.

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
